

Singapore Carbon Markets & Investor Forum

Fostering international linkages & investment

July 19 - 20 | In Person & Online

Partnership Prospectus

About the Carbon Market & Investor Forum

CMI is heading to Singapore in 2023. As the Australian carbon marketplace matures, it is time to build an international network of climate leaders.

International linkages are evolving at a pace that is only accelerating as the Australian Government has now lodged an updated NDC with the UNFCCC, and voluntary climate action ramps up.

There are lessons to be learnt, and taught, in convening professionals from across the APAC region. The Carbon Market & Investor Forum will facilitate new discussions, and build relationships with professionals, investors and policy-makers from across the region.

Event background

CMI's events attract professionals from across Australian & international carbon markets, with a well-regarded events calendar including the **Australasian Emissions Reduction Summit**, the **Carbon Farming Industry Forum**, and our **Carbon Conversation** and **Corporate Roadshow** series.

Through our member interactions, CMI has identified a demand for the growth of an international network, especially across the APAC region as organisations expand, and trading platforms and linkages develop.

With over **145 member organisations** across a range of industries engaging in carbon markets and emissions reduction activities, CMI is well positioned to engage a large and well-informed audience.

The Forum will be held as a **one and a half day** in person event on **July 19 & 20, 2023** in the CBD of the City of Singapore.

2023 Event Program

The Singapore Carbon Market & Investor Forum will be held as a one and a half day event on July 19 & 20, 2023.

The three general themes have been selected to provide a framework for the plenaries, workshops and networking events.

Day 1 of the program will focus on the key themes **Nature-Based Solutions**, as well as **International Linkages**, with relevant workshops, plenaries and networking opportunities. The day will conclude with a Forum dinner.

Day 2 will serve as an **Investor and Finance forum**, with opportunities for commercial interaction and networking through targeted workshops, and a networking luncheon.

Three Key Themes across plenaries, workshops and networking events.

1. Nature-Based Solutions

From urban Singapore to rural Australia, nature-based solutions hold opportunities to boost climate resilience.

As carbon markets evolve, so too does our capacity for holistic climate repair as we consider carbon as part of a picture, including biodiversity and other ecosystem services.

2. International Linkages

With the Article 6 Rulebook now finalised, growing numbers of countries are signing international carbon trading agreements.

Now is the time for seizing new investment opportunities that will achieve emissions reduction and associated co-benefits on a global scale.

3. Investor & Finance Forum

Finance and investment is key to the international low-carbon transition.

Increased demand for carbon abatement from both compliance and voluntary markets generates opportunities to build relationships across the finance and investor community in the APAC region.

Program & Themes to be confirmed closer to the event.

RESERVED

LEAD PARTNER

Our highest-level partner for the Forum. As proud Lead Partner, you can demonstrate your leadership in APAC Carbon Markets, with numerous opportunities for exposure through speaking addresses, promotion & branding.
