Fostering International Linkages & Investment

About the Carbon Market & Investor Forum

Building on the momentum of the last two years, CMI’s 3rd Carbon Market & Investor Forum is returning to Singapore on 16-17th October 2025.

International market linkages and voluntary climate action continue to ramp up, bolstered by renewed ambition through NDC’s submitted to the UNFCCC. New technologies, services and guidance are coming online, creating new market opportunities and efficiencies.

This international industry must keep up the momentum to decarbonise the global economy. The Forum will build relationships, foster new discussions, and connect professionals, investors and policy-makers from across the region.

Event Background

Singapore is well-positioned as a hub to convene high-impact professionals from government, business, investment, and service and technology provision.

Previous Forums have garnered significant regional interest demonstrated through support and participation from various Singaporean and Australian Government Ministries, global banks, law firms, carbon service providers, investors, traders, industry, research experts and more.

With over 145 member organisations across industries engaging in carbon markets and emissions reduction activities, and a highly regarded events calendar, CMI is poised to engage a large and well-informed audience.

The Forum will be held as a one and a half day in person event on October 16 & 17, 2025 at the PARKROYAL COLLECTION, Pickering, Singapore.

146 Organisations

70 Speakers

“One of the best forums on developing carbon assets I’ve attended in a while - genuine expert commentary and a solid balance of investors and project developers.” - Forum Survey (anonymous)

2025 Event Program

The Singapore Carbon Market & Investor Forum will be held as a one and a half day event on October 16 & 17, 2025.

The three general themes have been selected to provide a framework for the plenaries, workshops and networking events.

DAY 1

Day 1 of the program will focus on the key themes Nature-Based Solutions, as well as International Linkages, with relevant workshops, plenaries and networking opportunities. The day will conclude with a Forum Dinner.

DAY 2

Day 2 will serve as an Investor and Finance forum, with opportunities for commercial interaction and networking through targeted workshops, and a networking luncheon.

3 Key Themes across plenaries, workshops and networking events.

1. Nature-Based Solutions

Across the globe, nature-based solutions hold opportunities to boost climate resilience and draw down carbon at scale.

As carbon markets evolve, so too does our capacity for holistic climate repair as we consider carbon as part of a picture, including biodiversity and other ecosystem services.

Program & Themes to be confirmed closer to the event.

2. International Linkages

Now is the time for seizing new investment opportunities that will achieve emissions reduction and associated co-benefits on a global scale.

Countries are rapidly advancing on international trade and cooperative mechanisms, such as the Singapore-Australia Green Economy Agreement, and article 6 implementations.

Explore these advances, and collaborate on new opportunities.

3. Investor & Finance Forum

Finance and investment is key to the international low-carbon transition.

As new services and technologies are operationalised within the carbon market and ecosystem, we convene those leading the charge to spotlight their advances and create opportunities for investment in the transition. The 2025 Forum will feature a renewed focus on showcasing investment opportunities in the market.

2025 Partnership Packages

1 ONLY

Lead Partner

Our highest-level partner for the Forum. As proud Lead Partner, you can demonstrate your leadership in APAC Carbon Markets, with numerous opportunities for exposure through speaking addresses, promotion & branding.

The Lead Partner will also receive extensive networking and activation opportunities with a large number of in person & delegate passes included.

[^] Additional tickets offered to sponsors at a 20% discount.

Acceptance of all sponsor and exhibitor applications are subject to approval of CMI. Multiple sponsors from the same industry sector may be accepted into sponsorship categories, noting some limits at the highest levels to ensure programmatic diversity, independence and economy-wide appeal of the event.

CMI's Membership & Sponsorship Policy

Globally, expectations are increasing for private sector organisations to demonstrate greater transparency and credibility in their transition pathways towards net zero.

As companies grapple with how to lead in the climate crisis, CMI has a responsibility to engage and support business members in best practice responses. In line with these expectations, our 2025 Strategic Plan priorities CMI's objective to support member organisations to make urgent, credible climate strategies and transformative investments.

Our Member and Sponsorship Policy (Policy) - that takes effect from 1st July 2025 - reinforces CMI and our members' commitment to credible climate action.

It enables CMI to continue to act a leading institute and advocate for best practice in decarbonisation and the use of market-based solutions.

The Policy creates a tiered member and sponsorship structure focused on organisation type and public facing transition and/or climate plans (see table below). Member and sponsors that demonstrate alignment with the Policy are afforded full access to CMI's governance and higher tiers of sponsorship at lead events. Organisations whose transition plans are not as progressed will be invited to become associate members with continued access to CMI's membership services. The tiered structure allows CMI to continue engaging with and gaining input from a broad range of stakeholders, while remaining true to our vision and managing risk for CMI and its stakeholders.

Prospective sponsors are encouraged the view the [Policy](#) in full.

Organisation	Member & Sponsorship Policy Requirements	Membership Options	Sponsorship Tier Options
Large corporate (>\$5M revenue per year) or Carbon intensive (emissions > 100,000 t Scope 1 CO ₂ e per year)	Demonstrated	Corporate	All
	Not Demonstrated	Associate	Gold and below
Other potential sponsors and members	No transition plan requirements	All	All

Member and Sponsorship Policy Requirements

To join CMI as a corporate member or lead sponsor, large corporate and carbon-intensive applicants must have a public facing transition or climate plan, which reports on:

- Material scope 1 and 2 emissions and where possible identifies scope 3.
- Targets for scope 1 and 2 consistent with the Paris agreement and achieving net zero by 2050. Targets for scope 3 emissions should be included where possible.
- How actions taken to reduce emissions consistent with reported targets are given priority and when high integrity carbon credits are used for residual or hard to abate emissions.
- Resources committed to meet the organisations decarbonisation goals.
- Review mechanisms for the organisations transition plan.

Contact Us

On the journey to net-zero, don't miss this opportunity to associate your brand with CMI's premium climate action and business event.

If these options do not quite suit your organisation, please contact CMI so that we can customise a bespoke package. Please note all sponsor applications are subject to approval by CMI.
