

Steps towards net zero

Natalie Jade

The sun representing life force, it creates and sustains life. The footsteps are walking towards the sun to represent moving towards natural resources of energy.

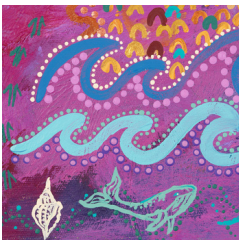

Meeting place representing the summit and coming together to work towards the universal goal of net zero and a better future for all. The people are represented around the meeting place.

The ocean and water is depicted as a form of a potential natural energy and the connection to the earth the waters and the beings living within them.

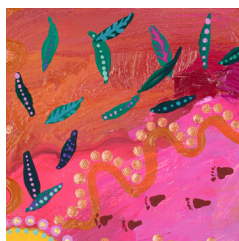

Footsteps throughout the artwork represents walking together towards a common goal of net zero.

The whales, sharks and sea life representing the water beings and the effects we have on all life on earth.

Large and small footsteps walking together represents the young and old walking and learning together.

Gum leaves show our connection to the trees and their important role they play in the health of the environment.
